MiniMo

The DynaVox M3

All Available in the Loan Bank!

Put in your requests for January!

The **M³** by DynaVox and the MiniMo are dynamic display AAC devices for emergent communicators of all ages and physical abilities. The communication in these devices is organized categorically. The **M³** uses concrete scenes and symbols to represent ideas and objects, while the MiniMo strictly uses symbols. Both of these devices can also act as an Environmental Control Unit (ECU). The M3 by DynaVox has essentially taken the place of the MiniMo.

DynaMyte 3100

The DynaMyte 3100 is no longer available by DynaVox, but is still available in the loan bank. This device can be used as an evaluation tool to determine the AAC features that work best for your students. The DynaMyte 3100 uses picture symbols and is a dynamic display AAC device. It can also act as an ECU.
