The Logan ProxTalker

Now available to check out through the loan bank!

The Logan ProxTalker is a moveable picture Augmentative Alternative Communication (AAC) device. The moveable pictures are called Sound Tags. Each Sound Tag is encoded with a radio frequency identification code. When the Sound Tag is placed on one of the five buttons and pressed, the ProxTalker detects the tag and then speaks the word associated with the picture. You can use this device to communicate one word or a full sentence by combining the pictures. The Logan ProxTalker Runs on 4 standard C batteries and can hold more than 10,000 words. The ProxTalker comes with premade Sound Tags as well as blank Sound Tags that you can program.

The ProxTalker might be used to transition someone from using the PECS System to using a device with voice output. This device is a simple, low-tech communication solution!

Borrow the ProxTalker from the loan bank today!
