Springboard

The SpringBoard is an effective communication aid for a wide range of clients including children and adults living in a variety of settings. This digitized, dynamic display device can be configured for 4-32 key locations. It comes with over 3,000 minspeak icons and the Language Activity Monitoring (LAM) software. Scanning access options including single and dual switch access, joystick or mouse emulation access products.

Springboard Lite

Designed for children and other entry level AAC communicators, Springboard Lite measures just 7.3" and weighs only 2.5 lbs. It features a built in handle for maximum portability, 4, 8, 15 and 36 location display options and all the capabilities of the Springboard Plus.
