

Spotlight Items

The Mini-Lite Box and Accessories were designed to help train low vision students to use their residual vision. The translucent white plexiglass work surface is lit from below, providing an even, high contrast background for opaque materials and a source of illumination for colored transparent items. The Mini-Lite Box is smaller than the original Light Box. It can be used at a student's desk or lap. This kit comes with the Mini-Lite Box and a variety of materials and activities.

Designed to teach low vision students basic visual skills, eye-hand coordination, and simple matching skills.

Kit includes overlays designed to stimulate awareness of light, patterns and objects; spinner; transparent and opaque items for practice in eye-hand coordination and matching.
