USB Wafer Switch

The USB Wafer Switch was purchased from AbleNet and is now available in the SWAAAC loan bank. This device has five switch sites that are just over 2 inches in diameter. Each switch site serves a different function. The Wafer Switch was designed to provide the user an opportunity to independently move the cursor on the computer screen.

Mousemover USB

The Mousemover USB was purchased from AbleNet and is now available in the loan bank. The USB Mouse Mover allows an individual to control all mouse functions on their computers using a combination of 6 single switches or any multiple switch. Pressing on each switch then delivers a specific mouse

function - click, press and hold, release, and all mouse directional movements. The Mousemover also has the ability to choose the desired mouse speed that is appropriate for your student.
